

## Jian Gao

---

CONTACT INFORMATION	Vancouver BC, Canada <a href="https://Jian-99.github.io/Timeline">https://Jian-99.github.io/Timeline</a>	(778) 325-5825 gaojian@alumni.ubc.ca
EDUCATION	<b>University of British Columbia, Vancouver</b> B.A.Sc. Electrical Engineering (with Distinction)	Anticipated Apr, 2021
HONORS AND AWARDS	UBC Dean's Honour List (2020) UBC Go Global Research Award (2020) Faculty of Applied Science International Student Scholarship (2020) William McMahan Scholarship (2020) TUM PREP Award (2019) UBC Outstanding International Student Award (2017)	
TECHNICAL PROJECTS	<b>Variable Reluctance Stepper Motor</b> Mar 2020 <i>A reluctance motor of a torque of <math>0.1N*m</math> was designed and built in this project.</i> <ul style="list-style-type: none"><li>• Used FEMM simulation software to determine the size and air gap of the motor</li><li>• Waterjet cut the stator/rotor, and 3D printed the casing</li><li>• Designed the control circuit and deployed Raspberry Pi for PID control</li></ul> <b>Coin Picking Robot</b> Mar 2019 <i>Programmed in C with STM32, a 32-bit Flash ARM-based microcontroller, the robot was designed to pick up all the coins scattered within a <math>0.5m^2</math> area using electromagnets.</i> <ul style="list-style-type: none"><li>• Designed the mechanism, control circuits, perimeter detector, coin detector</li><li>• Integrated HC-05 bluetooth module to control the robot wirelessly through an Android terminal</li></ul> <b>Construction of a CPU in Verilog</b> Nov 2018 <i>Digging into the operating principle behind a CPU, Verilog was used to build different essential components, such as a finite-state machine, a memory block, a data path etc.</i> <ul style="list-style-type: none"><li>• Configured DE1-SOC's switches and a 7-segment display as I/O wires to data path</li><li>• Tested other modules and CPU as a whole using Verilog testbench and a machine code set</li></ul>	
RESEARCH EXPERIENCE	<b>UCLA Online</b> , Jun-Jul 2020 <i>A Complementary Approach to Centralized Task Offloading Algorithms in Vehicular Ad-hoc Networks (VANETs)</i> <ul style="list-style-type: none"><li>• Discussed mathematical models for various realistic communication scenarios</li><li>• Developed and validated our approach to data offloading for VANETs</li></ul> <b>Sichuan University</b> Chengdu, China, Jul-Aug 2019 <i>Facial Recognition and Machine Learning</i> <ul style="list-style-type: none"><li>• Created a standard that accurately describes one's appearance</li><li>• Trained a neural network to deduce the race, gender, and age of the person</li></ul>	

	<b>Computer Science Research Center</b> Beijing, China, Aug 2018 <i>Quantum Computing and Neural Networks</i> <ul style="list-style-type: none"> <li>Implemented Gradient Descent to elevate the performance of an existing neural network</li> <li>Developed a neural network that determines if a set of polynomial equations can be simplified</li> </ul>	
WORK AND VOLUNTEER EXPERIENCE	<b>Jinniu District Library</b> Chengdu, China, Aug 2020 Lecturer, <i>Children's English Picture Book Reading Session</i> <ul style="list-style-type: none"> <li>Organized activities for the kids and guided them through English readings.</li> </ul> <b>UBC Centre for Accessibility</b> Vancouver, Canada, Sep-Dec 2019 Notetaker, <i>ELEC 321 (Stochastic Signals and Systems)</i> <ul style="list-style-type: none"> <li>Worked with UBC staff to provide legible class notes for students with disabilities</li> </ul> <b>Sichuan University</b> Chengdu, China, Aug 2018 Volunteer, <i>UK-China Workshop on Employing ICT for Mountainous Rural Community Relief from Natural Disasters</i> <ul style="list-style-type: none"> <li>Participated in guest reception at hotel for the seminar, photo taking and light control</li> </ul>	
PROFESSIONAL AFFILIATIONS	<b>UBC Aerodesign</b>	Sep 2019-Present
	<b>UBC Engineering Undergraduate Society</b>	Aug 2018-Present
ADDITIONAL EXPERIENCE	<b>Competition: SAE Aero Design West</b> Fort Worth, Texas (Delivered online due to COVID-19) Jun 2020 <ul style="list-style-type: none"> <li>UBC Aerodesign: 1st/3rd Place (Regular/Advanced class)</li> <li>Built a data acquisition system (DAS) with Arduino</li> <li>Developed a ground station which shows the data collected by the plane and its GPS trajectory</li> </ul> <b>Hackathon: Rogers 5G Edge Challenge</b> University of British Columbia Oct 2019 <ul style="list-style-type: none"> <li>Used Rogers 5G connection to offload compute to the local MobileEdgeX cloudlet</li> <li>Implemented facial and posture recognition in an Android application</li> </ul> <b>Workshop: Charging Supercapacitors Using Photovoltaic Cells</b> University of British Columbia/Fukuoka Institute of Technology Sep 2019 <ul style="list-style-type: none"> <li>Designed the architecture and circuit to efficiently collect solar power</li> </ul>	
SKILLS	Programming Languages: C, C++, Python, Swift, HTML/CSS, Javascript, SystemVerilog (HDL), ARM/8051 Assembly  Softwares: Altium Designer, Arduino, CircuitMaker, Matlab, Quartus/ModelSim, SimulationX, Solidworks  Others: Violin, Video Editing, English/Chinese/Basic German
